(54) SOUND ABSORBING STRUCTURE BODY

(57)Abstract:

PURPOSE: To provide a sound absorbing structural body which is compact and is capable of easily increasing the sound absorbing power of a low compass.

CONSTITUTION: This sound absorbing structural body 16 is integrally composed by arraying plural pieces of pipes 18 varying in length transversely in one row and connecting these pipes to each other or fastening the pipes to each other by means of the separate members to be exclusively used. The respective pipes 18 are closed at one-side ends to constitute closed parts 20 and are opened at the other-side ends to constitute apertures 22. The height positions of the apertures 22 are aligned to one row with all the pipes 18-1 to 18-n.

LEGAL STATUS

[Date of request for examination] 23.01.1996

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2785687

[Date of registration] 29.05.1998

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
